

Remote Deposit Capture

A fast, secure and convenient way to make deposits without leaving your office

With Remote Deposit Capture, you simply scan your deposit items and submit them online. Funds deposited before 7 pm ET will be available the next business day.

How it works

- ◆ **Convenient** - Make deposits from no need to pay a courier or visit a branch to deposit funds. You can deposit up to 50 items at a time, including cheques, money orders and bank drafts written in Canadian or US currency.
- ◆ **Easy** - Simply connect your HSBC-supplied scanner to your computer and access your HSBCnet profile. The web-based software is intuitive, clearly guiding you through the process to ensure deposits are accurately scanned and submitted.
- ◆ **Secure** - You set the user access controls to meet your business requirements. Your scanned deposit items are submitted to HSBCnet over a secure 128-bit encrypted connection.
- ◆ **Efficient** - Deposit slips are a thing of the past. The system software checks for duplicate items and its auto-balancing feature makes it easy to identify errors and manually correct or remove items after scanning.
- ◆ **Control** - We'll send you confirmation of each deposit, and you can generate both detailed and summary reports of your transactions. Scanned images of your deposits are available online for 90 days.
